

Magner Model 35 Currency Counter

The Magner Model 35 Currency Counter was designed for basic currency counting applications, reliability, and simplicity of operation. High quality control ensures consistency in the manufacturing of our products and has been instrumental in making the Magner Model 35 the number one selling currency counter worldwide.

The Model 35 operates at 1,300 documents per minute and features touch sensitive controls, automatic start, user adjustable batch stops and a grand total accumulation of all notes counted.

MAGNER Model 35 features include:

- 300 note input hopper capacity
- Variable batching from 1 to 999 notes
- 4 digit LED display and numeric keypad
- Microprocessor controlled operation
- Auto diagnostic test modes
- 16 ranges of selectable density settings
- Error detection of half note, double note, chain note, hopper jam, over count, under count, and door open errors
