

## Safes for storage of explosives SP Grade III

Adapted for outdoor use with sealing and drainage strips that prevent moisture inside the cabinets, lockable cover on the door that protects the lock. Equipped with 2 lifting loops on the top of the cabinet for easy transport between workplaces.

The safes are prepared with ground connections for connection of lightning protection. Detached warehouses for storing more than 500 kg of explosive goods must have protection against lightning.

Prepared for placement outdoors and are anti-rust painted and equipped with drainage strips.

Standard equipped with two changeable key locks.  
Combination lock or electronic combination lock on special order.

Standard equipped with a fire extinguisher and a weather protection over the handle and lock.

Prepared for anchoring. (2 \* M16 bolts included).  
Safes under 1000kg shall be anchored.

Fire protection certified by SBSC according to NT Fire 017 – 60P alternatively fire tested according to EI60.

Burglary protection certified by ECB·S according to European standard SS-EN 1143-1/EN 1143-1.
