

Prefabricated strongroom Grade I

Robur's Prefabricated strongroom in Grade I consists of wall, ceiling and floor panels welded or bolted together enabling installation in location where welding is not possible.

The Strongroom design is adapted to each project's conditions and needs.

The Strongroom is constructed with modular panels for a quick and easy assembly, disassembly and extension.

The vault door must have the same burglary protection grade as the panels.

The Strongroom is painted in light grey, RAL 7035.

Robur's Prefabricated strongroom can be fitted with reinforcements blocks for ventilation on special request.

As standard, the vault is equipped with a row of 3 conduits with $\varnothing 11$, placed above the door. Different placement and number of conduits is possible on special request.

Fire protection certified according to EI90.

Burglary protection certified by ECB•S according to the European standard EN 1143-1.
