

Security drawer pedestal for storage of medicine

RSH A2-4 & A1-6

Robur introduced the Time Delay Drawer Pedestal in Northern Europe more than forty years ago. Since then, almost one hundred thousands units have been installed. Many different models have been developed at customers' request through the years. RSH A2-4 & A1-6 are used for secure storage and easy management of medicines and drugs.

White RAL 9010.

The unit is equipped with Robur's unique pin-code lock, which is integrated into the construction.

Individual codes and time delays can easily be programmed for each drawer from the key-board.

It means that different type of drugs with different security levels (A and B drugs) can be stored in different drawers.

All drawers have movable plastic dividers.

Each unit is connected to the mains 240 A.C. by a transformer.

Operating Voltage 12 A.C. Maximum power use is 1,6A.

A backup battery is available on request.

The height can be adjusted with adjustable feet.

The unit is prepared for anchoring with two holes at the bottom. (Bolts are not included).
